The undersigned has reviewed all the documents in the chain of title of the above-identified applications and, to the best of undersigned's knowledge and belief, title to both is in the Assignee identified above.

Pursuant to 37 C.F.R. § 1.321(b), and to obviate a nonstatutory obviousness-type double patenting rejection, the Assignee identified above hereby waives and disclaims the terminal portion of the term of the entire patent to be granted upon the above identified application subsequent to the expiration of U.S. Patent No. 5,763,200. The Assignee identified above does not disclaim any terminal part of any patent granted on the above identified application prior to the expiration date of the full statutory terms of any patents granted upon U.S. Patent No. 5,763,200 in the event that any related patent later: expires for failure to pay a maintenance fee, is held unenforceable, is found invalid, is statutorily disclaimed in whole or terminally disclaimed under 37 C.F.R. § 1.321(a), has all claims cancelled by a reexamination certificate, or is otherwise terminated prior to expiration of their statutory term, except for the separation of legal title as stated above.

This disclaimer runs with any patent granted on the above application and U.S. Patent No. 5,763,200 and is binding upon the grantee, its successors or assigns.
